Subject Index

Aconitates, lanthanides, thermal decomposition 227, 231
Activation energy, of relaxation of amorphous silica 80
– –, of thermal decomposition of nickel tris-chelate complexes 106
– –, – – of aluminium sulphate 207
– –, of degradation of epoxidized polydienes 139
Age determination of fossils by thermal analysis 83
Aluminium oxide, reaction with ammonium sulfate 201
– sulphate, DTA, TG 204
Ammonium sulphate, reaction with aluminium oxide 201
Arsenic, phase diagram of, by DTA 143
Arylazohydroxynaphtoic acids, thermal decomposition 153

Benzene and carbon dioxide, desorption spectra 49
Bibliography section 245
Biography, of M. Taniguchi 3
Biological substances, application of thermal methods, review 8
Book review 243

Calcium oxalate, thermal decomposition kinetics 163
Carbonate minerals, DTA 18, 27
Cellulose, combustion and fire retardation 51
Chemisorption of propylene on zinc oxide 45
Chlorite minerals, DTA 28
Compensation effect, under varied experimental conditions 163
Complexes, tetracyanato-diaminochromate, kinetic analysis 123
–, tris-chelate of nickel, thermal analysis 101
Copolymers, styrene-divinylbenzenes, thermal decomposition 167
Crystallinity of poly(ethylene terephtalate), determination of 111
Crystallization processes, theoretical investigation 173
– temperature of poly(vinylidene chloride) 212

Dehydration, of nickel tris-chelate complexes 101
– of silica, TG 75
Derivative thermogravimetry, of arylazohydroxynaphtoic acids 153
– –, of cellulose 54
– –, of connective tissue 7
– –, of fossils 85
– –, of lanthanide aconitates 228, 232
– –, of nickel oxide, reduction by hydrogen 187
– –, – tris-chelate complexes 104
– –, of styrene-divinyl-benzene copolymers 169

— —, of wood 58
Desorption, temperature-programmed, for study of chemisorption 45
Direct injection enthalpimetry, determination of urea 93
Differential scanning calorimetry, of glass transition temperatures of triblock copolymers 195
— — —, of lipoproteins 11
— thermal analysis, of aluminium sulphate 204
— — —, of ammonium sulphate-aluminium oxide mixtures 203
— — —, of arsenic, for determination of the phase diagram 145
— — —, of arylazohydroxynaphtoic acids 153
— — —, of carbonate minerals 18, 27
— — —, of cellulose 51
— — —, of chlorite minerals 28
— — —, of connective tissue 7
— — —, dolomites 32
— — —, of epoxidized polydienes 138
— — —, of fossils 85
— — —, of glass devitrification 239
— — —, of granite 40
— — —, of hydroxide minerals 21, 26
— — —, of kaolinite minerals 37
— — —, of lanthanide aconitates 228, 232
— — —, of low-high quartz inversion 40
— — —, of montmorillonites 28
— — —, of nickel oxide 190
— — —, — tris-chelate complexes 104
— — —, of poly(vinylidene chloride) 212
— — —, of sulfate minerals 26
— — —, of sulfide minerals 25
— — —, of styrene-divinylbenzene copolymers 169
— — —, of tetracyanato-diaminochromate complexes 125
— — —, wood 58
— — —, zeolite minerals 29
Dolomites, DTA 32

Enthalpy of crystallization, of poly(ethylene terephtalate) 120
— of fusion, of arsenic 149
Epoxidized polydienes, thermal stability 135
Evolved gas analysis, of fossils 87
— — —, of reduction of nickel oxide by hydrogen 185

Fire propagation of cellulosics 60
— retardation, investigation on cellulose 51
Flammability of wood 59
Fossils, age determination by thermal analysis 83

Geological age determination by thermal analysis 83
Glass devitrification, kinetics by DTA 239
— transition temperature, of poly(styrene-b-isopren) triblock copolymers 193

Hydroxide minerals, thermal analysis 21, 26

Identification of minerals, key diagram for 22
Iron sulfide minerals, DTA 24

Kaolinite minerals, DTA 37
Kinetic analysis tetracyanatodiamino-chromate complexes 123
– equation, identifying for chemical transformation 161
– parameters of thermal degradation of polyimides 65
– –, – destruction of styrene-divinylbenzene copolymers 170

Lanthanide aconitates, thermal decomposition 227, 231
Limiting oxygen index test, combination with thermal analysis 53
Lipoproteins, differential scanning calorimetry 11

Melting behaviour, of poly(vinylidene chloride) 212
Mineralogy, application of thermal analysis in, review 15
Molecular weight dependence of glass transition temperatures 193
Montmorillonites, DTA 28

Nickel oxide, reduction by hydrogen, EGA 185
–, tris-chelate complexes, thermal analysis 101
Nitrogen compounds, determination by direct injection enthalpimetry 93

Phase composition of poly(ethylene terephtalate), determination of 111
Piloyan method, applicability to glass devitrification 239
Polydienes, epoxidized, thermal stability 135
Poly(ethylene terephtalate), phase composition, thermal investigation of 111
Polyimides, kinetic of thermal degradation 65
Poly(styrene-b-isopren) triblock copolymers, glass transition temperature 193
Poly(vinylidene chloride), melting behaviour 209
Propylene, chemisorption on zinc oxide 45

Quartz inversion, role in petrology 38

Rate constant of thermal reaction, dependence on sample size 235
Reduction of nickel oxide by hydrogen, EGA 185

Sample size, effect on rate constant 235
Silica, kinetics of structural relaxation 73
Styrene-divinylbenzene copolymer, kinetic of thermal destruction 167
Sulfate minerals, DTA 26
Sulfide minerals, DTA 25

Temperature-programmed desorption, apparatus for 46
Thermal decomposition, of arylazohydroxynaphtoic acids 153
– –, of lanthanide aconitates 227, 231
– –, of styrene-divinylbenzene copolymers 167
– –, of tetracyanato-diamino-chromate complexes 123
– measuring systems, theory 173
– stability of arylazohydroxynaphtoic acids 157
– –, of polyimides 70
Tissues, connective, investigation by thermal methods 7
Thermogravimetry, of aluminium sulfate 204
–, of ammonium sulfate-aluminium oxide mixtures 203
–, of amorphous silica 75
–, of arylazohydroxynaphtoic acids 155
–, of cellulose 54

Thermogavimetry, of connective tissue 9
–, of dehydration of silica 75
–, of epoxidized polydienes 138
–, of fossils 85
–, of lanthanide aconitates 228, 232
–, of nickel tris-chelate complexes 104
–, of polyimides 70
–, of styrene-divinyl-benzene copolymers 169
–, of tetracyanato-diamino-chromate complexes 125
–, of wood 58

Urea, determination by direct injection enthalpimetry 93
Urine, determination of urea in, by DIE 93

Wheathering of rocks, investigation by DTA 39
Wood, study of combustion and fire retardancy 56

Zeolite minerals, DTA 29
